

AMORIM CORK COMPOSITES
AMORIM SPORTS FLOOR
MAINTENANCE GUIDE

Cleaning and Maintenance Instructions

Note: Sealing the floor is not a necessary step and in fact, it is discouraged in very abusive applications (e.g., Health club free weight area or ice hockey perimeter flooring). However, high color percentage floors (>50%) or areas that experience foot traffic only will greatly benefit by being sealed.

A. Maintenance For Un-sealed Floors.

1. Amorim Sports Floor can be cleaned much like carpeting.
2. Daily vacuuming is encouraged to keep dust to a minimum.
3. If the flooring cannot be fully cleaned with a vacuum, a damp mopping with a mild soap and water solution will usually be sufficient.
 - a) It is important not to get the flooring too wet as this may have an adverse effect on the adhesive system employed.
 - b) Change the soap and water solution often!
4. Use a wet vacuum to remove excess water from the flooring.
5. Be sure to use a clean mop. This will keep your floor smelling fresh and clean.

B. Post Construction Maintenance For Sealed Floors.

1. Sweep the floor clean.
2. Dry vacuum to ensure any fine soil is removed.
3. Wet scrub floor with TASKI Profi cleaner (6-8 oz / gl of water) using buffer or autoscrubber with a TASKI contact pad or soft nylon brush.
 - a) TASKI floor care products are manufactured by JohnsonDiversey™ and can be found at many janitorial supply houses.
 - b) JohnsonDiversey™ customer service hotline is 800-626-5015
 - c) Look under institutional floor care products on their website at <http://www.diverseylever.com>
4. Recover soiled solution, rinse, and allow to dry thoroughly (6-8 hours).

C. Initial Treatment

1. Apply 3 thin coats of TASKI Vision Matte
2. Allow proper drying time before applying next coat.
 - a) Note: Apply floor finish with synthetic wax mop. While the finish is wet, buff the floor with floor buffer (150-300 rpm) and

soft nylon brush. This application drives the finish into the floor and prompts proper sealing and coating of the floor.

D. Daily / As Needed Cleaning

1. Dry vacuum floor thoroughly (daily).
2. Auto scrub or wet mop floor using TASKI Combiplus or TASKI Wiwax as needed. (2-3 oz/gl of water).
 - a) NOTE: In an office environment, the floor may become scuffed due to heavy foot traffic and may require weekly or as needed spray buffing or dry buffing of the floor with a mint or white pad. In application of spray buffing, use TASKI Wiwax diluted 50/50 with water.

E. Periodic Cleaning As Needed

1. Dry vacuum the floor thoroughly.
2. Wet scrub the floor with TASKI Profi (4oz / gl). This application is done with an autoscrubber or a buffer and wet vacuum. Use a TASKI purple pad for scrubbing the floor.
3. Allow the solution to remain on the floor for at least 5 minutes.
4. Wet vacuum soiled solution.
5. Rinse and allow to dry (1-2 hours).
6. Apply 1-2 thin coats of TASKI Vision Matte using a wet buffing process with soft nylon brush.

F. A Few Tips About Working With Amorim Sports Floor

1. Use a vacuum with a high CFM to pick up dust.
2. Wait for the floor to dry between applications of floor finish or sealer.
3. Apply floor finish (thin coats) with wax mop and follow with a floor buffer using a soft nylon brush.
4. For large areas, use an autoscrubber with a contact pad or soft nylon brush to clean the floor daily.
5. For stripping a rubber floor, use TASKI Ice-It and nylon brush.
6. For poorly maintained floors, it may be necessary to continue cleaning with Ice-It for an extended period.
7. For food areas, daily cleaning should be done with Profi (2-4 oz/gl).
