

Outdoor Deck Turf Tile Maintenance

Our Outdoor Deck Turf Tiles are durable and designed to withstand the outdoors year round. Nevertheless, they still require minimal and easy care. We highly recommend cleaning your flooring once or twice a year to improve longevity, cleanliness, aesthetics but more importantly, efficient water flow.

Follow these procedures to clean your Outdoor Deck Turf Tile:

Using a soft bristled vacuum attachment, vacuum any debris or dust that settles in the grass. This can easily be removed with the vacuum.

Vacuum under each tile. Tiles should be cleaned individually instead of removing them all. This ensures the leveling material is left intact and does not shift dramatically. Vacuum the surface and under the tile thoroughly.

Remove any debris caught between slats of the tile.

By using any tool such as a screwdriver or chisel to access these spaces, it is simple to dislodge anything that may get caught between the slats without lifting the tile. Remove this debris with the vacuum.
