

Cleaning & Maintenance Instructions

For Outdoor applications:

1. Standard cleaning and maintenance:
 - a. Spray with clean water using standard hose across entire playground safety surface.
 - b. Periodically use a commercial vacuum to remove loose particles from the seams and surface area.
2. Stubborn Stains:
 - a. Option 1:
 - i. Use a mild cleaning soap, and with a soft bristle brush scrub the affected area.
 - ii. Use clean water to thoroughly rinse any area covered with soap residue.

For Indoor applications:

1. Standard cleaning and maintenance:
 - a. Use a commercial vacuum to remove loose particles from the seams and surface area.
 - b. Use a damp mop saturated in mild cleaning soap & water, run the mop across surface area until dirt is removed.
2. Stubborn stains:
 - a. Use a mild cleaning soap, and with a soft bristle brush scrub the affected area.
 - b. Use clean water to thoroughly rinse any area covered with soap residue.

Recommended Long-term Maintenance:

1. Keep the surface area free of unnecessary debris that could “scar” or damage the area.
2. Follow recommended cleaning activities at least once per month.
3. Keep seams free of loose debris; loose pebbles can accumulate and potentially cause harm to children.
4. Ensure your Surfacing Mat system has a proper drainage system. Your substrate should have a slope which guides and prevents water from accumulating beneath your mats for any length of time.
