

“Do It Yourself” Installation Guide

Install Instructions for: Sport Play Tile

Materials Needed:

Utility Knife

Protective Gear (adhesive applications)

The tiles are installed with adhesive, or one inch tiles can be held together using our 3 inch Connector Pins to lock them together. This allows them to be installed with no adhesive at all, and in the future to be relocated to a different area. 48x4 inch Ramps (beveled edge piece reducers) are also available for the one inch tiles - used at the edges to prevent tripping and provide a border.
