Re: Potential LEED credits for projects using Ultrabond G21 (*based on LEED-NC, version 3*)

To whom it may concern:

Indoor Environmental Quality Credit 4.1 (1 point): Low Emitting Materials: Adhesives & Sealants

Mats Inc. Ultrabond G21 adhesive has a low VOC content (36 g/L) which reduces the quantity of indoor air contaminants. The VOC limit required by LEED for Indoor Carpet adhesive is 50 g/L. The VOC limit required by LEED for Rubber Floor adhesive is 60 g/L. The VOC limit required by LEED for Multipurpose Construction adhesive is 70 g/L. Ultrabond G21 may contribute to LEED IEQ Credit 4.1.

If you require any further information, please do not hesitate to contact us.

Sincerely,
