

Propel Commercial Carpet Tile

Maintenance Instructions

SKU: PFTILE-

Initial Cleaning

Vacuum (with heavy-duty commercial vacuum) the floor to remove all dirt and grit. This is the single most important maintenance activity for preserving the floor's appearance and performance – and typically the most overlooked and omitted. For best cleaning results, use a heavy-duty commercial vacuum cleaner that features a rotary power brush or beater bar to remove deeply embedded dirt particles, especially in heavy traffic areas. Matting products release more soil when dry.

Routine Daily Cleaning

Vacuum (with heavy-duty commercial vacuum) the floor to remove all dirt and grit. This is the single most important maintenance activity for preserving the floor's appearance and performance – and typically the most overlooked and omitted.

- Use a heavy-duty commercial vacuum cleaner that features a rotary power brush or beater bar to remove deeply embedded dirt particles, especially in heavy traffic areas. Matting products release more soil when dry.

Deep Cleaning

Conduct deep cleaning as needed, when your routine cleaning is not meeting your expectations.

- Matter Surfaces fibered floorcoverings should be periodically deep cleaned by the Hot Water Extraction method. Best results and quickest dry times will be achieved with commercial truck-mounted steam extraction machines. Extraction cleaning removes deeply embedded soils and should be performed as needed, based on your traffic count and soil level. A minimum quarterly extraction cleaning is recommended for high traffic applications, more often during winter months in high traffic lanes where deeply embedded soil may be present.

As Needed

Spot Removal

If a spill occurs, use a clean absorbent cloth or paper towel to absorb as much of the liquid as possible. Spray the stained area with an all-purpose spot remover and rub the surface with a clean white cloth. Turn the cloth often to a clean side. Grease or oil based stains may require a citrus-solvent based spot remover. All-purpose and citrus-solvent spot remover are available from your local janitorial supply distributor*.

** Note: - Always test spot removers in an inconspicuous area of the mat.*

Gum Removal

Excess chewing gum should be scraped off with a standard putty knife. Chewing gum residue may require use of a citrus-solvent based spot remover or a chewing gum freezing chemical (aerosol) available locally at your janitorial supply distributor.
