

“Do It Yourself” Installation Guide

Install Instructions for: Wall Padding (Z Clip)

Z Clips Mounting System

Eliminates any unsightly mounting hardware or trim at the top of the pad for a clean smooth look. A 1” lip at the bottom of the pad makes sure the pads stay securely in place, the bottom lip can also be eliminated by adding a second “Z” Clip Mounting system to the bottom of the pad. Eliminating the top lip and trim means that these panels can be easily removed for future service or vinyl repair.
