

# WEARWELL LEED CERTIFICATION

## Did You Know . . .

Anti-fatigue mats and flooring can offer LEED points for your facility in two ways. According to REQHEQ8o1 - 8.2 Indoor contaminant control (1 point each, maximum 2 points) which is to install permanent walk-off mats at each entry that are at least 4 feet in length and allow accessibility for cleaning (e.g., grating with catch basin).

Plus, Recycled Content: LEED 2009 awards points for the use of products that contain recycled materials. Credit levels have specific thresholds for the required percentages of post-consumer recycled material or pre-consumer recycled material.

## Wearwell products using recycled content and qualifying for a LEED Credit of 1 point:

<b>Product</b>	<b>% Recycled</b>
Modular Diamond-Plate Grease Proof	>33% Post Industrial
