

3M Safety-Walk 3200 Aquatic Wet Area Matting Maintenance

Initial Cleaning

Vacuum the floor with a heavy-duty commercial vacuum to remove all dirt and grit. Use a commercial vacuum cleaner that features a rotary power brush or beater bar to remove deeply embedded dirt particles.

Daily Cleaning

Vacuum the floor to remove all dirt and grit with heavy-duty commercial vacuum. This is the single most important maintenance activity for preserving the floor's appearance and performance – typically the most overlooked and omitted.

Use a heavy-duty commercial vacuum cleaner that features a rotary power brush or beater bar to remove deeply embedded dirt particles, especially in heavy traffic areas.

Note: Matting products release more soil when dry.
